

Zealot Desk

by Henry Yun Huang

Zealot Desk is inspired by the art of origami. This design allows the user to fold down the desktop without having to put their things away. They can simply move objects to the shelf at the back of the desk. As space is narrow in Victorian style prisons and the rate of incarceration is increasing in the UK, cell space has become a major problem. Therefore, Zealot Desk is designed with a fixed shelf on the back of the desk to place necessities. When it is not in use, the user can simply flip down the desktop to get more room space.
