

Stretch

by Aleks Vuko

Stretch is a multi-functional storage and sliding desk unit, which addresses the needs of male prisoners in the UK. One unit per occupant can be fitted in each cell, meaning each inmate can have their own storage and desk area. I hope this solution will reduce conflict between cellmates by creating equal division of space and allowing them to adapt the furniture to their preferred use. The desk saves valuable space by sliding behind the storage unit when it's not in use. It also encourages the user to keep a tidy workspace, which is shown to increase productivity.
