

# 3 IN CUBE

Winning Design Concept by Ines Attieh

3 IN CUBE is a set of three modular cubes that each have a purpose. The Gym Cube can be used to do exercise, the Chair Cube can be used like a chair, and the Keep Cube can be used to store belongings. However, all cubes can be used for storage. The set of cubes can be stacked and oriented in various positions to allow inmates to personalize their space. Additionally, all three cubes can be placed under the bed to save space. Thanks to the colour and flexibility of the cubes, 3 IN CUBE brings some joy and a sense of home to this small space.
