How to protect your bag in four easy steps:

1. Avoid thieves from slashing your bag and stealing its contents by lining the inside of your bag with chicken wire or a metallic sheet.
2. Prevent thieves from dipping into your bag by securing your zip with a lock.
3. Deter thieves from snatching your bag by using a personal alarm with pin-pull activation - should someone try to snatch it the deafening sound will frighten them away.
4. When in a public space, secure your bag strap to a table leg or chair by using a cable lock or portable bag hook so you always have your bag in sight.
